

Recover vent gas from crude oil storage tanks

- Prevent hazardous emissions
- Re-capture otherwise lost gas into the production process

Maintain tank safety systems

- Over-pressure protection
- Vacuum protection

Mexico - Onshore

Issue

- Gas venting from storage tank
 - Environmental emissions
 - Safety risk from electrical storms

Solution

- Used SJP to capture vent gas
- Recycle to maintain tank pressure
- Discharged into inlet rectifier

Benefits

- No further emissions
- Made use of available HP recycle gas
