

About us

What we do

Caltec is a world leader in:

- Production boosting solutions using jet pumps, for oil and gas applications.
- Compact in-line separation of gas and liquids, including degassing of fluids.

With patented products and solutions, Caltec has a successful, proven record in adding value to major oil companies world-wide – typically a production increase of 25% to 40%.

We use existing sources of energy, such as high pressure wells, to increase production, optimize the process flow, and reduce the environmental impact of production. Our compact equipment is designed and supplied to address real production issues; clients include BP, Chevron Texaco, AGIP, ExxonMobil, Talisman, and ConocoPhillips.

What we can do for you

Caltec's patented and proven technology can:

- Boost production rates
- Significantly increase the volume of commercially extractable oil and gas reserves
- Extend the life and productivity of oil and gas fields
- Lower the unit cost of production
- Measure production volumes more accurately
- Reduce the environmental impact of production

Why Caltec

At Caltec, we work with our clients to develop solutions tailored to your specific needs. We offer:

- **Proven technology** – delivering substantial value to clients world-wide.
- **Reliable solutions** – compact equipment, no moving parts, virtually no maintenance.
- **Low risk** – we are leaders in our field; our track record has a 100% success rate.
- **High rewards** – typically a 25% to 40% increase in production.

Why not come and see it for yourself at the Caltec demonstration labs?

Seeing is believing
