**CALTEC LTD Team Wins Hart's  
E & P Award for Engineering Innovation**

The award was presented at OTC in Houston USA, for the development of the WELLCOM system which utilizes energy from higher pressure oil or gas wells to significantly boost the production and increase total energy recovery from lower pressure wells.

WELLCOM has been proven to boost recovery by as much as 41% and can be used in gas, oil or multiphase applications. The system has no moving parts or energy needs and has very low maintenance requirements.
